39B.1 Section 39B was established effective 1 April 1993 in the context of the restructuring of the Secretariat to identify the activities and resources of the Department for Economic and Social Information and Policy Analysis.

39B.2 The projected 1993 requirements under the section would result in decrease of the 1992-1993 appropriation in the amount of $843,900. The decrease under "Other changes" results from the following developments.

A. Posts (Decrease: $569,400)

39B.3 The decrease of $569,400 is attributable to delays in filling the vacant posts redeployed to the Department in the context of the new treatment of vacancies during 1993 as well as delays experienced in filling replacement posts of staff on temporary assignment with peace-keeping operations.

B. Other staff costs (Decrease: $101,700)

39B.4 The decrease of $101,700 under this heading results from lower than estimated requirements under "General temporary assistance" ($82,300) and "Overtime and night differential" ($19,400).

C. Consultants and experts (Decrease: $35,500)

39B.5 The decrease under this heading ($35,500) is attributable to the fact that one ad hoc expert group meeting scheduled for 1993 under programme "Statistics" was not held.

D. Travel (Decrease: $87,900)

39B.6 The estimated savings under this heading in the amount of $87,900 result from lower than estimated travel requirements for the Department in the course of the programme implementation.

E. Contractual services (Decrease: $19,600)

39B.7 The savings under this heading in the amount of $19,600 were attributable to delays in preparation of and backlogs in the editing and printing of the publications of the Department.

F. General operating expenses (Decrease: $19,700)

39B.8 The decrease in the amount of $19,700 is primarily the result of the reduced usage of computer disk storage and other data-processing equipment of the New York Computer Centre, in particular under programme "Statistics".
